

PETER KAMAL FALTAS

Oracle Database Administrator | Linux Systems Administrator | GIS Data Specialist

Cairo, Egypt • <mailto:peterkamal297@gmail.com> • 01118019894 • 01555722808 • <https://www.linkedin.com/in/peter-kamal-faltas-859509232> • github.com/peterkamal297-alt/oracle-dba-lab-portfolio

PROFESSIONAL SUMMARY

Junior Oracle Database Administrator with hands-on experience in Oracle Database 19c and Linux administration through a dedicated VMware lab environment. Practical experience includes Oracle installation and configuration, core database administration, RMAN backup and recovery, Data Guard, Oracle RAC/Grid Infrastructure, and Oracle Enterprise Manager. Brings a strong background in data management, data integrity, quality control, and technical documentation from large-scale geospatial database projects.

CORE COMPETENCIES

- **Linux Administration & Oracle Installation:** terminal & Linux commands, users & groups, files & permissions, processes & services, networking, disk/LVM/filesystem management, SSH; Oracle Database 19c installation & configuration — Oracle Home/Oracle Base, Listener & TNS, database/instance setup, CDB/PDB, SQL*Plus, SQL Developer
- **Oracle DBA Administration:** users & privileges, tablespaces & datafiles, control files, redo logs, undo & temporary tablespaces, startup/shutdown, parameter files, performance tuning, locks & deadlocks, indexes & execution plans
- **Backup, Recovery & High Availability (Data Guard):** RMAN full & incremental backup, archive log management, restore & recovery, point-in-time recovery, Fast Recovery Area (FRA); Data Guard — primary/standby (physical standby), redo transport & apply, switchover, failover, Data Guard Broker
- **Oracle RAC, Grid Infrastructure & OEM:** RAC architecture, Grid Infrastructure, Clusterware, ASM, SCAN/VIP, multiple database instances, RAC administration & monitoring; Oracle Enterprise Manager — monitoring, performance analysis, alerts, job scheduling, database maintenance
- **Database Design, Data Management & Documentation:** data validation, topology/structure validation, geodatabase and spatial database design supporting a centralized national database; technical reporting, data quality documentation, cross-functional support to engineers, programmers and IT project managers
- **GIS, Geospatial Analysis & Survey/CAD:** ArcGIS, ArcGIS Pro, QGIS, PostGIS, GeoServer, spatial data validation, topology validation, geodatabase management, remote sensing (ERDAS Imagine, ENVI); AutoCAD, Civil 3D, Total Station operation, quantity surveying, longitudinal & cross-section calculations, layout surveys for roads and utility networks
- **Professional Skills:** analytical thinking, planning & organizing, clear communication, cross-functional collaboration, fast technical adaptation

PROFESSIONAL EXPERIENCE

Prior professional background — see Technical Projects below for hands-on Oracle Database Administration work

GIS QC & GIS Specialist — MBS Project — Military Survey Department (via EDGE PRO / SIG SMART) *Feb 2024 – Jun 2026*

- Delivered geospatial QC and data alignment on a nationwide building-survey initiative covering all governorates of Egypt, working directly under Military Survey Department standards
- Used QGIS, AutoCAD, and Google Earth Pro to create, edit, and align geospatial data with precise X/Y coordinate orientation
- Conducted topology validation and built spatial databases from shapefiles feeding into a large-scale centralized national database
- Drew and oriented buildings and utilities with accurate dimensioning in AutoCAD, producing complete CAD maps with boundaries and measurements per site
- Verified spatial boundaries (streets, adjacent plots, open land) using satellite imagery and coordinate referencing
- Collaborated with engineers and survey teams to maintain data integrity and compliance with national geospatial standards

Surveyor — Orascom Construction

Jul 2020 – Oct 2023

- Operated Total Station and leveling instruments for road and utility network surveys
- Prepared longitudinal profiles and layout surveys for electricity, water, and sewage networks

Camera Technician — Q Tech

Mar 2019 – Sep 2019

- Assembled and tested surveillance camera systems from installation through final testing

TECHNICAL PROJECTS

Oracle Database Administration & Linux Infrastructure — Personal Lab Environment (VMware) — Self-directed

Jun 2025 – Present — **Lab Documentation:** step-by-step screenshots and notes for each topic above —

github.com/peterkamal297-alt/oracle-dba-lab-portfolio

- **Linux Administration:** installed Linux from scratch and practiced core administration — terminal commands, user/group management, file permissions, process and service management, basic networking, disk/LVM/filesystem management, and SSH — as the OS foundation for Oracle environments
- **Installation & Configuration:** installed and configured Oracle Database 19c, including Oracle Home/Oracle Base setup, Listener & TNS configuration, and CDB/PDB multitenant architecture, using SQL*Plus and SQL Developer
- **Core DBA Administration:** managed users & privileges, tablespaces & datafiles, control files, redo logs, and undo/temporary tablespaces; handled startup/shutdown operations and parameter file configuration
- **Performance & Troubleshooting:** monitored database performance, applied tuning techniques, analyzed locks/deadlocks, and used indexes and execution plans to optimize queries
- **Backup & Recovery:** performed RMAN full and incremental backups, managed archive logs and the Fast Recovery Area (FRA), and executed restore/recovery and point-in-time recovery operations
- **High Availability (Data Guard):** configured primary/standby (physical standby) environments, redo transport and apply, and practiced switchover/failover operations using Data Guard Broker
- **Oracle RAC & Grid Infrastructure:** studied and practiced RAC architecture, Grid Infrastructure and Clusterware, ASM, and SCAN/VIP configuration, including administration and monitoring of multiple database instances
- **Enterprise Manager (OEM):** used OEM for database monitoring, performance analysis, alerts, job scheduling, and routine database maintenance

TRAINING & CERTIFICATIONS

- **Oracle Database Training – SQL & Administration** — Global Academy (Oracle University Partner, Egypt). SQL, Oracle DBA Administration, RMAN backup & recovery
- **GIS Data & Database Fundamentals** — Penta-b. QGIS data/map management, PostGIS database fundamentals, GeoServer/Map Server publishing, enterprise web mapping applications
- **Going Places with Spatial Analysis · Imagery in Action · Cartography** — Esri
- **Remote Sensing & GIS Fundamentals** — National Authority for Remote Sensing and Space Sciences. ArcGIS/ENVI; urban-change monitoring case study, Mansoura City, Dakahlia
- **Introduction to Geo-Informatics** — Information Technology Institute (ITI)
- **ERDAS Imagine & Geomedia Analysis Tools** — EDGE-PRO
- **Additional Training** — Egypt Electricity Holding Company (GIS) · General Authority of Meteorology (GIS & weather sciences) · Egyptian Survey Authority (survey works)
- **AutoCAD** — Autodesk

EDUCATION

Bachelor of Arts — Surveying, Geographic Information Systems and Remote Sensing

Cairo University — 2023 • GPA: 3.36 / 4.00

LANGUAGES

Arabic (Native) • English (Intermediate)
